Issue 1, Amendment 4

'AMC and GM to SERA — Issue 1, Amendment 4'

Note to the reader

In amended, and in particular in existing (that is, unchanged) text, 'Agency' is used interchangeably with 'EASA'. The interchangeable use of these two terms is more apparent in the consolidated versions. Therefore, please note that both terms refer to the 'European Union Aviation Safety Agency (EASA)'.

GM1 Appendix 1 to SERA.14001 General

The phraseology in AMC1 SERA.14001 does not include phrases and regular radiotelephony procedure words contained in SERA Section 14.

Words in parentheses indicate that specific information, such as a level, a place or a time, etc., must be inserted to complete the phrase, or alternatively that optional phrases may be used. Words in square parentheses indicate optional additional words or information that may be necessary in specific instances.

GM2 Appendix 1 to AMC1 SERA.14001 General

The phraseologies listed in Appendix 1 to AMC1 SERA.14001 are organised per phases of flight or per use of specific communication, navigation and surveillance technologies that require the exchange of specific communication between ATS personnel or ground crew and flight crews.

With regard to the communications between flight crews and ATS personnel, the tables specify the ATS phraseologies to be used to perform ATC service or FIS functions respectively. Consequently, the two rightmost columns indicate which of the ATS phraseologies are to be used for ATC functions, for FIS functions, or for both ATC and FIS functions.

In general, the subject SERA phraseologies constitute a standardised core content of identified phrases for usual situations; they do not constitute an exhaustive list. When circumstances differ, pilots, ATS personnel and other ground crew will be expected to use plain language which should be as clear and concise as possible and, when applicable, in the level specified in the relevant rules on language proficiency.
